

# Frogs

Reading Made Simple

ir

Here are some words you will read in this book.

You can sound them all out.

Practice them until you can read them easily.

Then you will be ready to read the book.

dot	tad-pole	gills
breathe	lungs	

This book is to be read after the sound

**igh**

has been learnt.

Reading Made Simple

[www.readingmadesimple.weebly.com](http://www.readingmadesimple.weebly.com)

**Introduction:** In this book you can find out how a frog grows from a tiny black dot in jelly, to a little frog.

Frogs can live on the land  
or in the water.

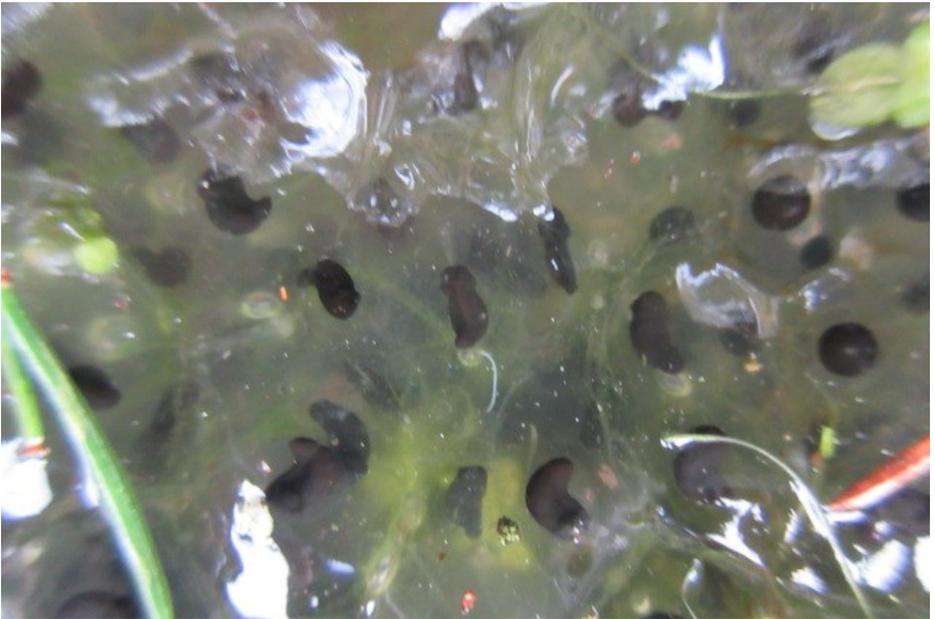

Frogs can swim in the  
water. They hop and  
jump on the land.

Here are frog's eggs in  
the water.

Look at the black dots.

The black dots are the

frog's eggs.

dots

Each black dot might be a  
frog.

First the egg gets a tail.

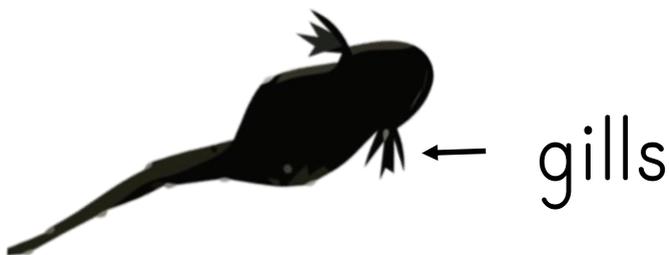

Can you see the long tail?

It is a tad-pole.

The tadpole can swim in  
the water.

The tadpole has gills so  
that it can breathe.

tadpole

gills

breathe

The tadpole eats and  
eats.

It feeds on weeds in the  
water.

At five weeks, the tadpole  
gets two back legs.

The tadpole has not got  
gills.

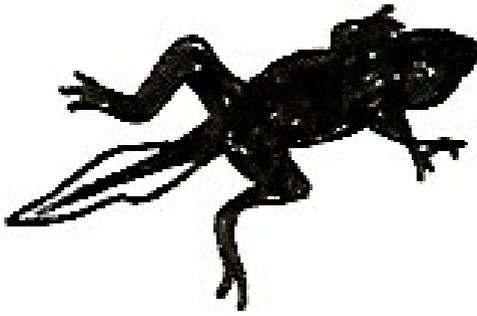

At six weeks, the tadpole gets lungs so that it can breathe like we do.

It must go to the top of the water to breathe.

lungs

At ten weeks the tadpole  
gets more legs.

It looks like a frog.

It still lives in the water.

Can you see  
the short tail?

The frog will not need a tail.

It eats and eats.

Soon it is a frog.

It can jump on the land

and

swim in

the

water.

A frog still likes to go back to the water to swim as it needs to keep its skin damp.
